INDEX.

Agassiz, L. his Réchérches sur les Poissons Fossiles, 460
Agriculture, Elements of, by Professor Low, 459
Anderson, G. and P., their Guide to the Highlands and Islands of Scotland, &c. 459
Animalcules, natural history of, by Andrew Pritchard, 204
Animals depicted on antique monuments, by M. Marcell de Serres, 268
Arago, M., on double stars, 1
Arnott, G. A. Walker, on new genera of plants, 260
Arts, useful, reports on the progress of the, by Mr Sang, 321
Association, British, address to the, by Professor Forbes, 247—Proceedings of, 369
Astronomy, 364

Boase, Dr, on primary geology, 459
Boué, Dr, on the theory of the elevation of mountain chains, as advocated by M. Elie de Beaumont, 123
Botany of the Himalayan Mountains, by J. F. Royle, Esq. noticed, 204
Brain, observations on the structure of the, 183
Brown, T., Esq. his remarks on the remains of a very large oak tree, 53—on the ancient Caledonian Forest, 57
Burdiehouse, notice of further discoveries at, by Dr Hibbert, 196

Cetacea, on some of the, by Professor Traill, 177
Chameleon, on the change of colour in the, by H. M. Edwards, Esq. 313
City, freedom of the, of Edinburgh, conferred on M. Arago, &c. 449
Connell, Arthur, Esq. description and analysis of a mineral from Faroe, 198

Davy, John, M. D., his observations on an error in the Bakerian lecture of Sir H. Davy, pointed out by M. A. Von Beck, 42—observations on euchlorine, 49—experiments on silicated fluoric acid gas, 243

XUM

Don, David, Esq. his attempt at a new arrangement of the Ericaceae, 150
Dutrochet, M., on the origin of mouldiness, 305

Earthquake, notice of an, in South America, 202
———— notice of an, at Saena in Peru, by B. J. Reid, Esq., 174
Edwards, H. M., Esq. on the changing colour in the chameleon, 313.
Eisdale, Rev. E., his observations on ground ice, 167
Euchlorine, observations on, by Dr Davy, 49

Forbes, Professor, his address to the British Association, 247
Forest, Ancient Caledonian, remarks on the, by T. Brown, Esq. 76
Fossil fishes, observations on the, lately found in Orkney, by Dr Trail, 195
Fringes, coloured, on a new species of, by Mungo Ponton, Esq. 191

Galbraith, William, A. M. on Workman's correction of middle latitude sailing, 180—Mathematical and Astronomical Tables, second edition, 203
Geology, Primary, by Henry S. Boase, M. D. 459
Glands, on the structure and uses of the mammary, of the cetacea, by Professor Traill, 363
Graham, Dr, his description of new or rare plants, 189
Green, George, Esq. his researches on the vibrations of the pendulum in fluid mediums, 194
Greenock, Right Honourable Lord, his observations on the igneous rocks of the neighbourhood of Edinburgh, and their relations to the secondary strata, 193
Greenough, George Bellas, Esq. his remarks on the theory of the elevation of mountains, 205
Ground-ice, observations on, by the Rev. Mr Eisdale, 163

Harlan, Dr, his critical notices of various organic remains, 342
Harris, William Snow, Esq. on the investigation of magnetic intensity by the oscillations of a horizontal needle, 196
Heat, on the influence of colour on, by Professor Powell, 228
Hibbert, Dr, his notice of further discoveries at Burdiehouse, 196
Hygrometer, observations on the, 331

Iguanodon, discovery of the bones of the, near Maidstone, Kent, communicated by Gideon Mantell, Esq. 200

India, Illustrations of the Botany of, by J. F. Royle, Esq. 204

Low, Professor, his Elements of Agriculture, 359
Lyell, Charles, Esq. on the loamy deposit called "Loess" of the Basin of the Rhine, 110

Magnetic intensity, on the investigation of, by the oscillations of a horizontal needle, by W. J. Harris, Esq. 196
——————— experiments on, by Dr Traill, 197
Malaria, on, 161
Mantell, Gideon, Esq. on the discovery of bones of the iguanodon in a quarry of Kentish rag, near Maidstone, Kent, 200
Meikle, H., Esq. on finding the dew-point, &c. from the cold induced by the evaporation of water, 98
Mesolite, analysis of an Indian specimen of, by Robert D. Thomson, M. D. 186
Mouldiness, on the origin of, by M. Dutrochet, 305
Mountains, elevation of, remarks on the theory of the, by George Bellas Greenough, Esq. 205
Mountain chains, elevation of, on the theory of the, as advocated by M. Elie de Beaumont, by Dr Boué, 123

Oak tree, remarks on the remains of a very large, by T. Brown, Esq. 53
Observatory, Edinburgh, letter to the editor on the, 451

Patents, list of, 461
Pendulums, vibrations of, in fluid mediums, by George Green, Esq. 194
Phillips' new work on Geology, 462
Plants, on new genera of, by G. A. Walker-Arnot, Esq. 260
Poissons, Fossiles, Réchérches sur les, par L. Agassiz, 460
Ponton, Mungo, Esq. on a new species of coloured fringes, 191
Powell, Professor, on the influence of colour on heat, 228
Pritchard, Andrew, Esq. on the natural history of animalcules, 204

Reid, John, Esq. his notice of an earthquake at Saena in Peru, 174
Remains, organic, critical notices of various, by Dr Harlan, 242
Royal Society of Edinburgh, proceedings of the, 191
Royle, J. F. Esq. his Illustrations of the Botany of the Himalayan Mountains, noticed, 204

Sang, Mr, on the progress of the useful arts, 321

Scotland, Guide to the Highlands of, by G. and P. Anderson, 459
Seiches, on the, of the lake of Geneva, 285
Silicated fluoric acid gas, experiments on, by Dr Davy, 243
Society of Arts, proceedings of,
Stark, James, M. D. his experiments regarding the influence of colour on heat, &c. 65

Table, geological, by R. I. Murchison, Esq. 365
Tables, mathematical and astronomical, by Wm. Galbraith, Esq. 203
Thomson, Robert D., M. D. his analysis of an Indian specimen of mesolite, 186
Traill, Professor, on some cetacea 177—his observations on the fossil fishes lately found in Orkney, 195—his experiments on magnetic intensity, 197—on the structure and uses of the mammary glands of the cetacea, 363

Wernerian Natural History Society, premiums offered by the, 195
